## **DEHN showcases cutting-edge electrical safety solutions at ELECRAMA 2025**

**ELECRAMA is one of the largest electrical and power exhibitions for the Indian electrical industry and the largest standalone show in the electrical and allied equipment industry. High-performance lightning and surge protection is an integral part of safety concepts developed for many applications: industry, the supply of energy and raw materials, telecommunications and data centres. It minimises risks, ensures a constant flow of data and prevents damage or system failure. DEHN possesses huge expertise in the development and optimisation of lightning and surge protection concepts. This knowledge is also channelled into special engineering services like individual risk analyses and testing.**

**At this year's ELECRAMA from 22 to 26 February in the India Expo Centre & Mart in Greater Noida, Delhi NCR, DEHN can be found at Stand 8 in Hall 1 showcasing a wide range of products and protection solutions for futureproof plants and systems. Take a look at the latest innovative monitoring and control systems for predictive maintenance and real-time insights such as DEHNrecord SD EPMS and DEHNrecord SD CPMS.**

DEHN solutions increase the availability and service life of installations and systems. These include customised protection solutions for various industries, including oil & gas, telecommunications and renewable energies.

DEHNrecord SD EPMS, for example, is a state-of-the-art system for monitoring and ensuring the effectiveness of earthing systems featuring real-time monitoring, remote access and intelligent diagnostics.

DEHNrecord SD CPMS is a cathodic protection (CP) monitoring system for pipelines. It automates monitoring and allows pipeline operators to retrieve monitoring data as required. Real-time monitoring helps reduce corrosion-related risks and consequently extends the service life of pipelines while minimising downtime.

Visit DEHN at ELECRAMA to learn more about these and other products. Discover customised solutions to meet your safety requirements. Meet the technical experts from DEHN face to face and discuss the challenges you encounter when it comes to lightning and surge protection, earthing, safety equipment and smart devices.

**About DEHN SE**

DEHN is a leading, international family-owned electrical engineering company based in Neumarkt, Germany. With its comprehensive portfolio, DEHN addresses the megatrends of our time - from e-mobility and renewables to the protection of critical infrastructure. The company offers solutions and services for lightning and surge protection as well as safety equipment – fields in which, with more than 1,100 patents, DEHN is a leading innovator. The company's products protect people and buildings, systems and telecommunications technology, process industry, as well as photovoltaic systems and wind turbines.

With more than 2,500 employees worldwide, DEHN achieved revenue of around 470 million euros in the fiscal year 2023/2024. Alongside more than 110 years of experience, this constant growth is based on the highest quality standards and a consistent orientation towards customers and markets worldwide.
